

PRIVACY POLICY

1. Javeps is committed to maintaining the privacy and security of personal information received from all its clients. In connection with the providing of requested goods and services to you, Javeps received information about you and/or your company. This information may have included one or more e-mail addresses.
2. At the time such information was delivered, you were informed that Javeps could use such information to allow Javeps to have future communication with you, and by providing such information, you granted permission for such use. However, such use is limited to internal use by Javeps. Except with your consent, Javeps will not sell, share or rent personal information to third parties. Notwithstanding the preceding, while Javeps shall strive to protect the personal information of its customers, Javeps will release personal information if required by law or in the good-faith belief that such action is necessary or appropriate.

DATA OR INFORMATION COLLECTION

3. Our web sites, newsletters and, from time to time, certain other products and services, have features that automatically collect information from customers. Through this information gathering process, Javeps is able to deliver content specific to customers' interests and to honor their preferences. This information also assists us in creating products and services that will serve the future needs of our customers.
4. For example, we use "cookies," a piece of data stored on the user's hard drive containing information about the user. If users reject the cookies, they may be limited in the use of some areas of our web site. By noting some of the pages the user visits on our web sites and via our e-mail newsletters, we can track and target the interests of our users to enhance the experience on our sites and via e-mail newsletters.
5. We may also send e-mails (including newsletters) for which you have registered (or otherwise agreed to receive). Cookies may be used in such e-mail messages to help us measure the effectiveness of our advertising and how customers use our web sites and other products and services. We may combine demographics information supplied by a customer at registration with web site usage data to provide general profiles, in aggregate non-personally identifiable form, about our customers and their preferences in the content of the site and advertising. We may share this composite information (in non-personally identifiable form) with our advertisers and business affiliates to help them better understand our services.

6. If we change our Privacy Policy Statement, we will post those changes on this page so our users are aware of what information we collect, how we use it and under which circumstances, if any, we disclose it. Users should check this policy frequently to keep abreast of any changes.
